Thanks Dan! And the thanks to the crew! Well done folks. I'll send this on to Tricia. On a related note, Dan, we are deploying to Northern New Mexico in support of START today, so I'll be heading down there and will likely be harassing one or more these guys to deploy once again. Take care, and let us know if there's any additional support you need.

Guys, I can't adequately express my gratitude to the field crew that helped EPA respond to the GK release. You all were the tip of the spear and brought the very first bit of information to the Agency and affected community. I am starting to get feedback as people are recognizing the rapid thorough data collection we provided-All while achieving our initial sampling objectives. Mark and John please forward the agencies gratitude to the highest levels of TechLaw. This really was a BFD.

Currently the agency is ramping up and I will likely be here for the remainder of the week. The river looked much better this morning and we got lots of rain from Silverton to Durango which is a very good thing.

Get some rest this weekend folks and pat yourselves on the back.

Dan
